Just in time for the 60th anniversary of the JFK assassination, the **JFK X** documentary film reveals the startling truth of what really transpired during this tragic historical event.

On November 22, 1963, the world was shocked by the assassination of the 35th President of the United States, John F. Kennedy. History tells us JFK was killed by lone assassin Lee Harvey Oswald.

The assassination of JFK was, and is, one of the most controversial events in history. Filmmakers Jay Weidner and Ryder Lee brilliantly reveal the real truth behind the Kennedy assassination by analyzing and enhancing the famous Zapruder film. The filmmakers used new technology available today, and finally show with the facts that always existed what really happened to JFK.

Weidner, the former Director of Content and Production at GAIA TV ([gaia.com](http://gaia.com)) and creator of *Kubrick's Odyssey* series, sheds a brilliant new light and incontrovertible truth about the JFK assassination. Just like his *Kubrick's Odyssey* film series on the moon landings, once you see this documentary, you will be shocked and amazed as you learn for the very first time what really happened that day in Dallas almost 60 years ago. Weidner is joined by new filmmaker, Ryder Lee, to bring you the film that solves the crime of the century.
